

## Advantages of CompleteSuite under our Hosted Offering

- ✓ Concretio provides connectivity to ILECs/Trading Partners
- ✓ Connectivity to LIDB, CNAM, E911, SOA and LNP Providers
- ✓ Server Hardware
- ✓ All you need is access to the Internet
- ✓ Lower I/T and Operating Costs

**CompleteSuite** is Concretio's collection of OSS modules that provides automated acquisition and conversion of customers onto a facilities based platform. CompleteSuite's modules are available via Concretio's hosted offering or can be deployed on-site. The underlying automated Work Flow engine is what gives CompleteSuite its unique advantage over all other OSS solutions available to telecom carriers. The Work Flow engine allows CLEC, ICP's, VoIP and cable companies to acquire customers onto their network with minimal user input.
